

# CTL Audiovisual Services

## *Who are we and what do we do?*

We are a Kent-based company who specialise in consultancy, design & production of custom-made audio-visual packages to the highest specifications to meet clients' exact requirements. We pride ourselves on our ability to provide creative and cost-effective audio-visual solutions.

Where a system is already installed we offer a variety of service & maintenance packages as well as comprehensive and competitive hire service for exhibitions and presentations.

## *What sort of AV systems can we provide?*

We can provide almost any type of audio-visual system ranging from a simple projector or LCD panel installation, through to a complete networked auditorium system, including videoconferencing. We also offer Digital Signage solutions for large buildings, call centres, shopping centres, and fully integrated Hard of Hearing systems. Many of the systems we provide include integrated programme control. E.g. AMX, Crestron

## *What sort of projects are we involved in and for whom?*

We are and have recently been involved in a number of high profile projects within both the private and public sectors.

### **Foreign and Commonwealth Office**

Installation of all audiovisual systems for new Consular Crisis Centre. This consists of a number of LCD display monitors in the centre, three of which are for the main command area to monitor three TV or satellite channels or computer information from the Governments secure network, simultaneously. Other monitors are around the centre & in the main secure conference room. The conference room is equipped with Videoconferencing with direct links to worldwide consular offices. A lectern & speech reinforcement system is also included for briefings and presentations

The whole system is controlled by a programmable touch screen.

### **City of London, The Guildhall**

CTL Audiovisual Services are the AV contractor for the refurbishment of the North Block of the London Guildhall. This project involves complete rack mounted audiovisual installations (including hard of hearing induction loop systems) into a number of meeting and function rooms

### **Bluewater shopping Centre**

We have installed and maintain the centre management's audiovisual systems in their main boardroom and other meeting rooms. This consists of a fully integrated programme touch panel controlled system including projection, screens, various audio & visual feeds.

We are currently working with the centre management on rolling out LCD screens with centrally managed digital signage systems throughout the shopping centre.

The above are just a small sample of the projects that we have recently been and are currently involved in.
